Portfolio: iamgravz.github.io/myPortfolio

OBJECTIVE

To get an entry-level IT support or web development position where I can learn more and use what I have learned from my school projects, while I finish my BS in Information Technology.

SUMMARY

- BSIT student at PUP Open University System
- Led my group in our school project PDTS, a document tracking system for the PUP OUS Registrar's Office with a web and Android version
- Can install and set up web systems on Windows, including the database and SSL certificate, and fix common setup errors
- Worked in live casino operations from 2013 to 2024, including three years as a Pit Boss handling dealers, players and shift problems

WORK EXPERIENCE

Pit Boss November 2021 to 2024
DB Live Casino, Mandaluyong City

- Supervised dealers and table games during my shift
- Checked that every game was run correctly and payouts were accurate
- Handled player complaints and disputes on the floor
- Fixed the MD3 machines on the tables when they malfunctioned

VIP Online Casino Dealer January 2013 to March 2021
Intevalue Services Inc., PBCom Tower, Makati City

- Dealt table games for VIP players on a live online stream
- Supervised play and checked hands for winnings

PROJECTS

PDTS: PUP OUS Document Tracking and Submission System Project Leader
Built with React, TypeScript, Node.js, Express and PostgreSQL; Android version made with Capacitor

- Lets registrar staff record the documents students submit and check them against a list of requirements
- Sends the student an email when the status of their documents changes
- Has two user roles (Registrar Officer and Head Admin) and a log of staff actions
- My part: leading the group, the database, setting it up on Windows, building the Android APK, and the documentation

AGILE OUS Membership and Student Welfare System In development
HTML, CSS, JavaScript, PHP, MySQL

- Working with one groupmate on a system for our organization's member applications and evaluations, which are currently done in Google Forms and Sheets

Barangay Health Center Management System
HTML, CSS, JavaScript

- School project for recording patients and consultations in a barangay health center

RestroBit Restaurant POS
Node.js, Express, MySQL

- School project: backend of a restaurant point-of-sale system

SKILLS

Programming	Basic knowledge of HTML, CSS, JavaScript, PHP, Java, TypeScript and Python
Frameworks	Used in school projects: React, Node.js / Express, Tailwind CSS, Spring Boot
Databases	PostgreSQL, MySQL, MariaDB
Tools	Git and GitHub, VS Code, XAMPP, Windows troubleshooting
Others	MS Office, Google Workspace, ERD and system documentation

ORGANIZATIONS

Committee Head, Membership and Student Welfare 2026 to Present
AGILE OUS (Academic Guild of IT Learners and Experts), PUP Open University System
New organization, currently being formed

- Will handle applicant interviews, evaluations and member concerns
- Helping set up the organization and its membership process

EDUCATION

Bachelor of Science in Information Technology 2024 to Present
Polytechnic University of the Philippines, Open University System

Associate in Information Technology 2011 to 2012
Datamex Institute of Computer Technology

TRAININGS AND CERTIFICATES

- Java Programming NC III Training, C&C Academy (TESDA program); OJT and certificate to follow
- Google AI Essentials, Google (March 2026)
- Google Prompting Essentials, Google (March 2026)
- Python Essentials 1, Cisco Networking Academy (April 2025)
- Introduction to Visual Graphic Design, TESDA (March 2025)
